

For our guests

<https://padiroffi.wixsite.com/eleo>

Casa ELEO

Our house in San Pantaleo is not an ordinary "holiday rental property", but our holiday domicile in Sardinia. It was rebuilt by the Architect Jean-Claude Lesuisse and set up by us within a short time so that there is nothing missing when you retire in San Pantaleo. Of course, some things will change over time.

But you can find everything (if not too much) that you need for comfortable living. The kitchen is also fully equipped – Not with cheap Ikea products – and a lot of nice things decorate the house.

So, it is very much up to our guests as well, to take care of their home environment.

Pls. smoke only outdoors, don't abuse the sofa as a trampoline, do not spray the walls with graffiti and leave "our" personal things where we have deposited them.

Damage

We would like to assume that our «Guests» will report to us if something does not work, has been broken, or otherwise provides excitement. We would like to take care of it and get a replacement. If there is any damage - we are all insured and therefore it will be a simple thing to fix the problem.

Internet

A good connection is such a thing in San Pantaleo. At the moment we have «still» a modem with a SIM card from Tim, which is sufficient for communicative matters. The connection is not the fastest, but it is enough for mails or Whatsup etc. Surfing and streaming YouTube is not the purpose of the connection and should not be done. The SIM card and our subscription are not designed for this purpose. Just pure communication please. The code for logging in is on the back of the modem and on the box.

Waste disposal

Waste disposal-There is no more "simple" waste in Italy – everything is disposed of separately.

Light

Of course we are glad if our guests are not Unnecessary Light the whole house if it doesn't have to be. When leaving the house, the light should be off.

Laundry

Of course we have a washing machine to wash clothes. The wet things can be dried over the stand, either outdoors, or by means of the dehumidifier, which has a special "dry drying" function.

Water

The water comes with little pressure to San Pantaleo. For this reason we have built an additional pump with reservoir. However, it should be borne in mind that fresh water in Sardinia is scarce and therefore do not waste water please.

Security

The village is basically very safe. In comparison with larger towns, practically nothing happens here. But also in San Pantaleo, the opportunity makes thieves. Accordingly, when leaving the house, we ask our guests to ensure that all windows and doors are closed.

Culinary

Of course, there are a variety of restaurants and pizzerias. A local, not a 3 minute walk combines super pizzas with delicious food. Pizzeria Ichnos, in the curve at the main street. If you want to go a little further and drive (15 minutes) then the Ristorante Vecchio Mulino is very good – especially for meat, but also their pizzas are very fine. We will share our experience over the last 20 years soon on our site with everyone.

On-Site Help

Elisabetta Pala (+ 39 338 266 4159), a good friend of ours, is responsible for the house during our absence. She brings the waste (already separated) for you to the landfill and cleans the house (weekly cleaning and final cleaning). Since she is a very good cook, one can also ask her to cook something. Either in the house or she brings it ready prepared for consumption.

Grazie mille

Marine und Patrizio
